WEB DEVELOPMENT

ACTIVITY-BASED LEARNING SUBMISSION

Selected Case Studies 17 · 22 · 23

STUDENT	DETAILS
Name	RAJULAPTI SRINIVASA RAO
Roll Number	26001414
Branch / Section	CSD-1 (sec-1)
Course	Web Development
Academic Year	2026–2027

Prepared according to the Web Development Activity-Based Learning task circular. The circular requests three selected case studies and awards 10 marks through the respective Web Development faculty member.

Submission overview

This report documents three separate HTML and CSS websites. The section order follows the selected case-study numbers: Case 17, Case 22, then Case 23. Screenshots supplied with the assignment are included as output evidence and grouped according to their visible content.

Case	Project	Evidence supplied
17	Tourism and Heritage Information Website	3 screenshots
22	Movie Review and Rating Website	2 screenshots
23	Gaming and Esports Community Website	3 screenshots

Implementation note

The source bundle contains one `index.html` and one separate `style.css` for each site. The screenshots document the supplied website outputs. Descriptions below summarize visible sections and the requirements in the circular and referenced conversation; the evidence is not presented as proof of behavior beyond what can be seen in a static screenshot.

The three websites use HTML5 and CSS3 only. Their navigation links point to sections on the same page, layouts use responsive CSS grids and media queries, and no application backend or JavaScript behavior is included.

CASE STUDY 17

Tourism and Heritage Information Website

Objective

The objective is to present Indian travel destinations and heritage information in a visually organized, easy-to-browse page.

Features

Destination cards are labeled by region; sections cover historical monuments, Diwali/Holi/Pongal/Onam, local cuisine, a photo gallery, and practical travel tips. Internal navigation links connect the main sections.

Technologies and implementation

HTML5 and CSS3, with responsive CSS Grid/Flexbox layouts, hover styling, and image cards. Photographs are referenced by external image URLs.

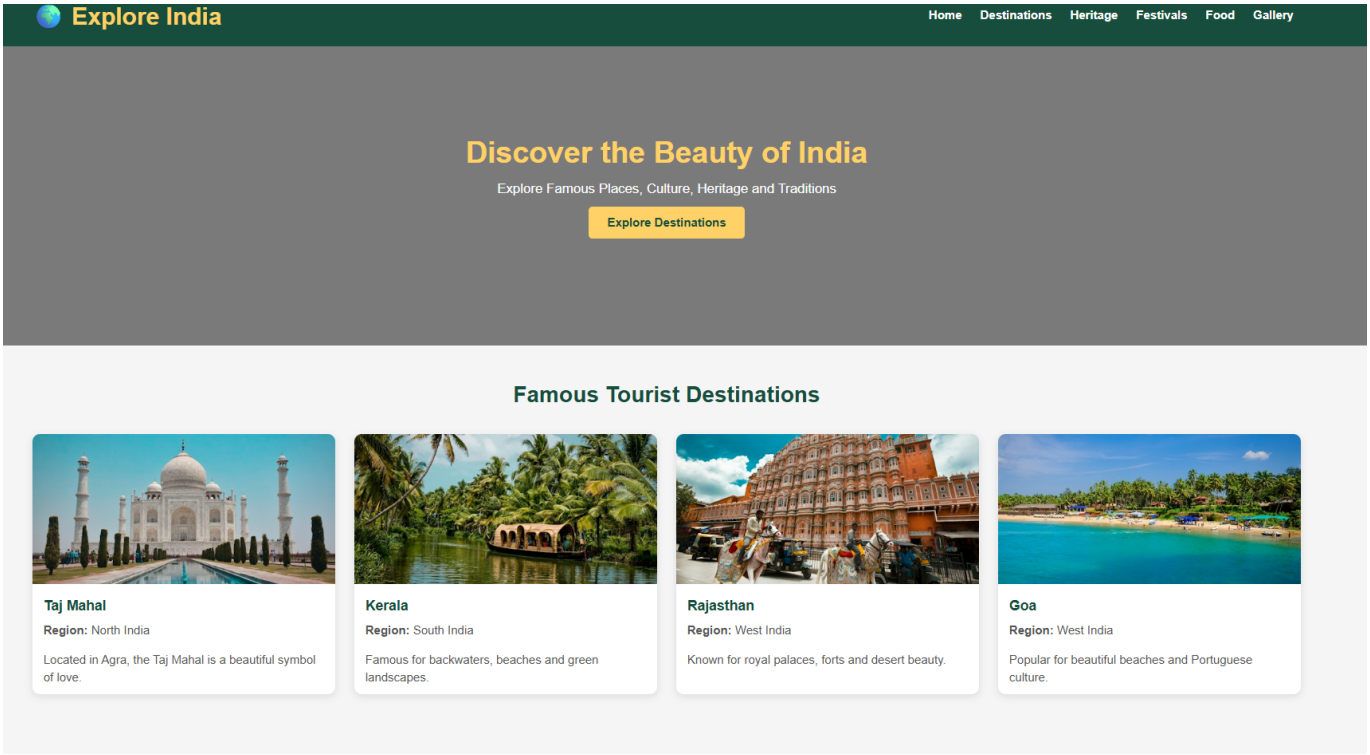

Observed output

The supplied screenshots show the Explore India header and hero, regional destination cards, monument cards, festival and food cards, a four-image gallery, and a travel-tips list.

Source files: case-17-tourism/index.html and case-17-tourism/style.css

OUTPUT EVIDENCE

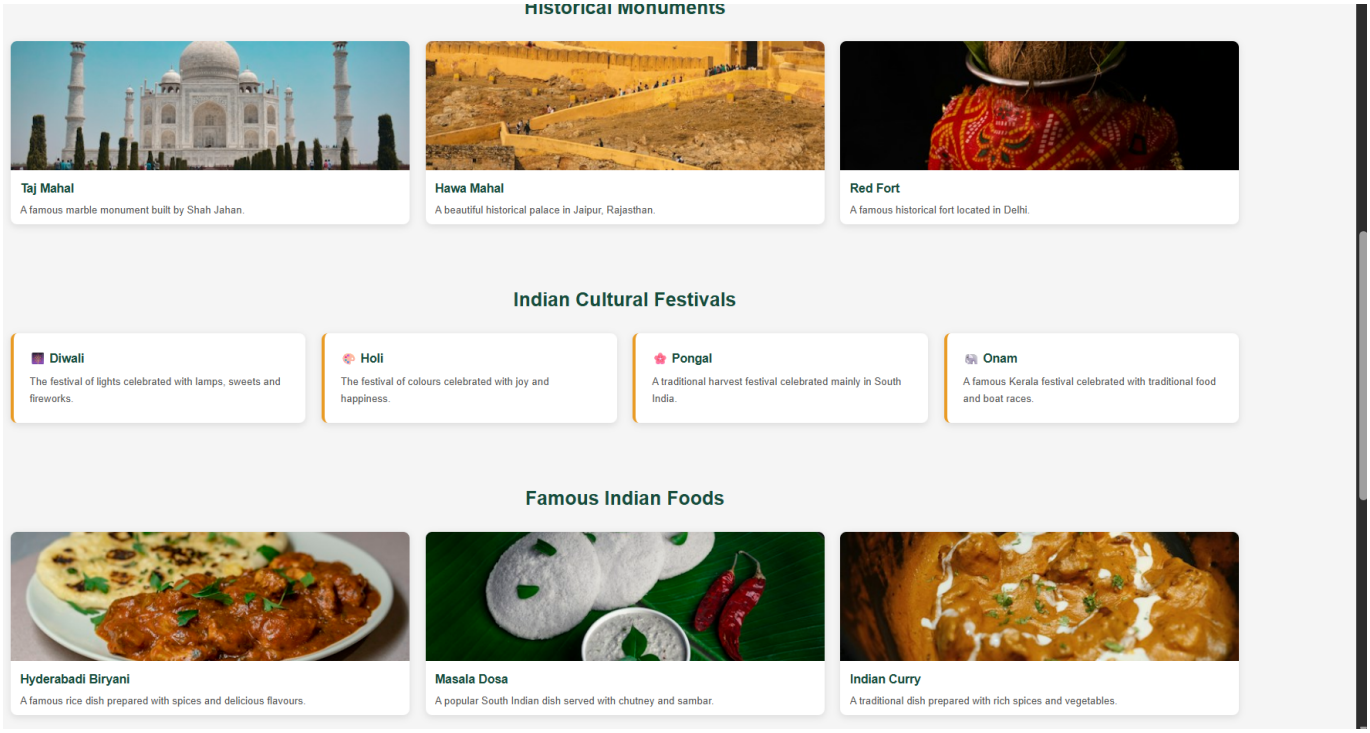

Case 17 · Explore India home and destinations

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

OUTPUT EVIDENCE

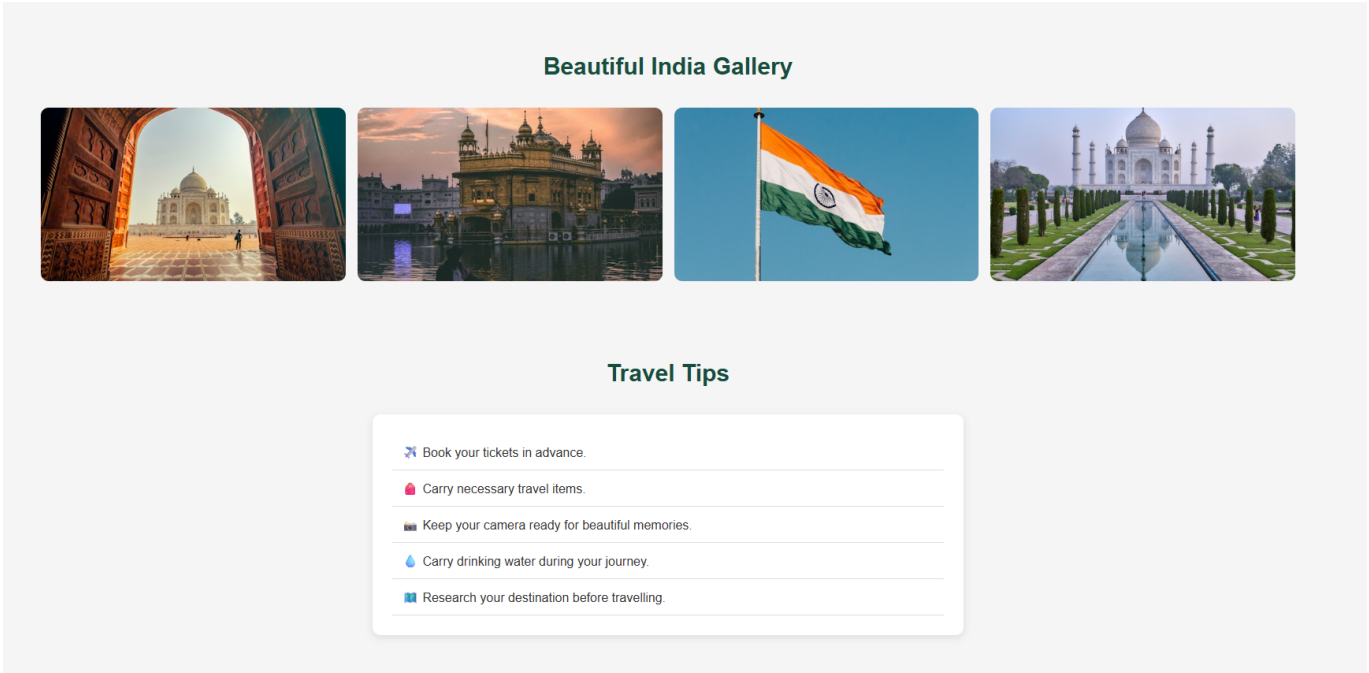

Case 17 · Monuments, cultural festivals and food

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

OUTPUT EVIDENCE

Case 17 · Gallery and travel tips

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

CASE STUDY 22

Movie Review and Rating Website

Objective

The objective is to help visitors browse movie details and read short review and rating summaries.

Features

Movie cards show poster, genre, release year, cast, synopsis, and rating. Separate critic-review cards and an About section are included, with Home/Movies/Reviews/About navigation.

Technologies and implementation

HTML5 and CSS3, with dark styling, responsive movie/review grids, card layouts, and section anchor links. Poster and hero imagery use remote image URLs.

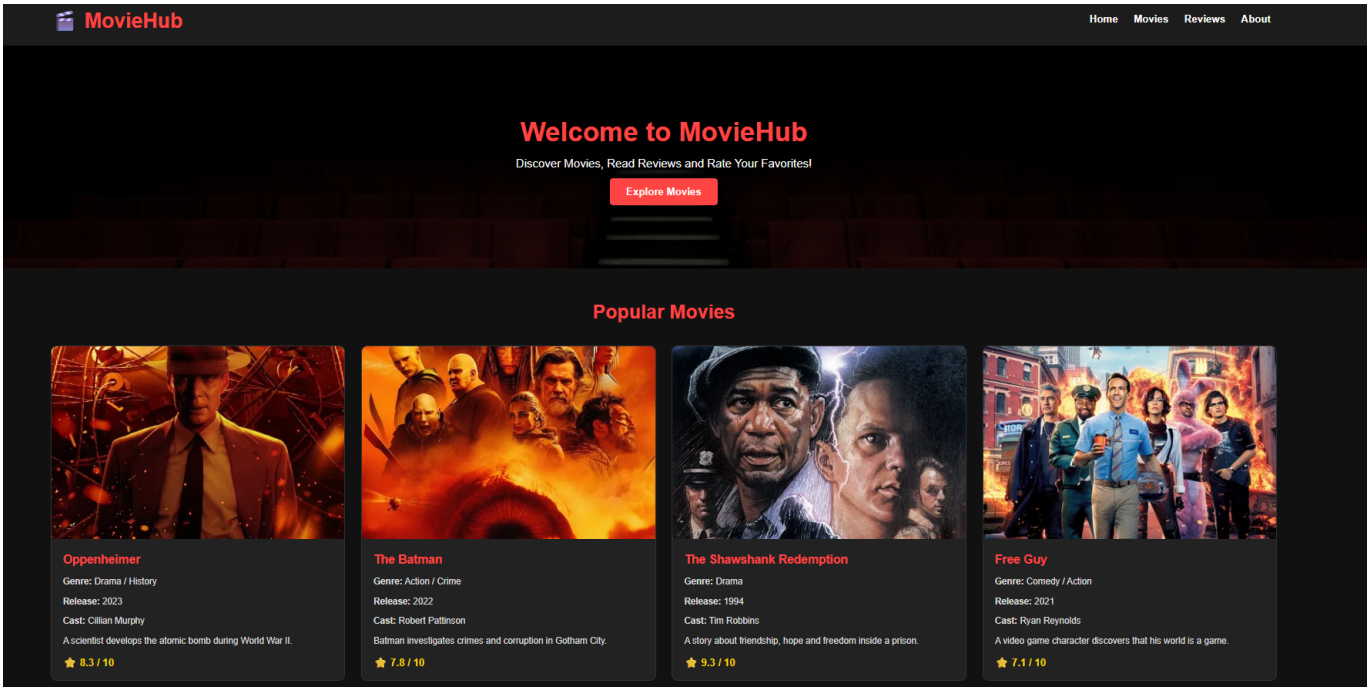

Observed output

The screenshots show the MovieHub header and hero, four movie cards, ratings and details, three critic-review cards, and the About MovieHub section.

Source files: case-22-movie-review/index.html and case-22-movie-review/style.css

OUTPUT EVIDENCE

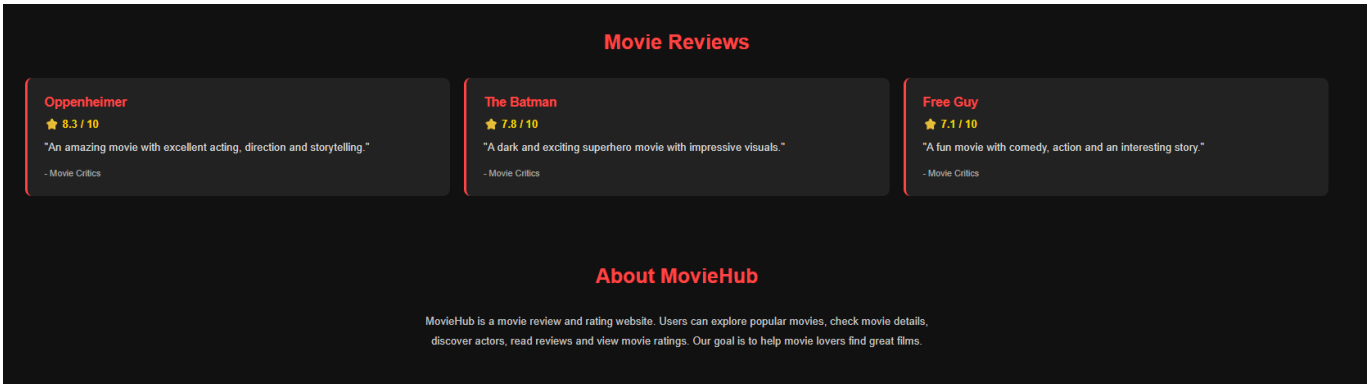

Case 22 · MovieHub home and popular movies

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

OUTPUT EVIDENCE

Case 22 · Movie reviews and about section

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

CASE STUDY 23

Gaming and Esports Community Website

Objective

The objective is to present a gaming portal for browsing game profiles and sample esports community information.

Features

The page includes game profiles, a tournament schedule with dates and prizes, team cards, player ranking table, and gaming-news cards. The dark theme uses cyan accents and hover effects.

Technologies and implementation

HTML5 and CSS3, with responsive CSS Grid, horizontally scrollable table wrappers on narrow screens, anchor navigation, and CSS hover transitions.

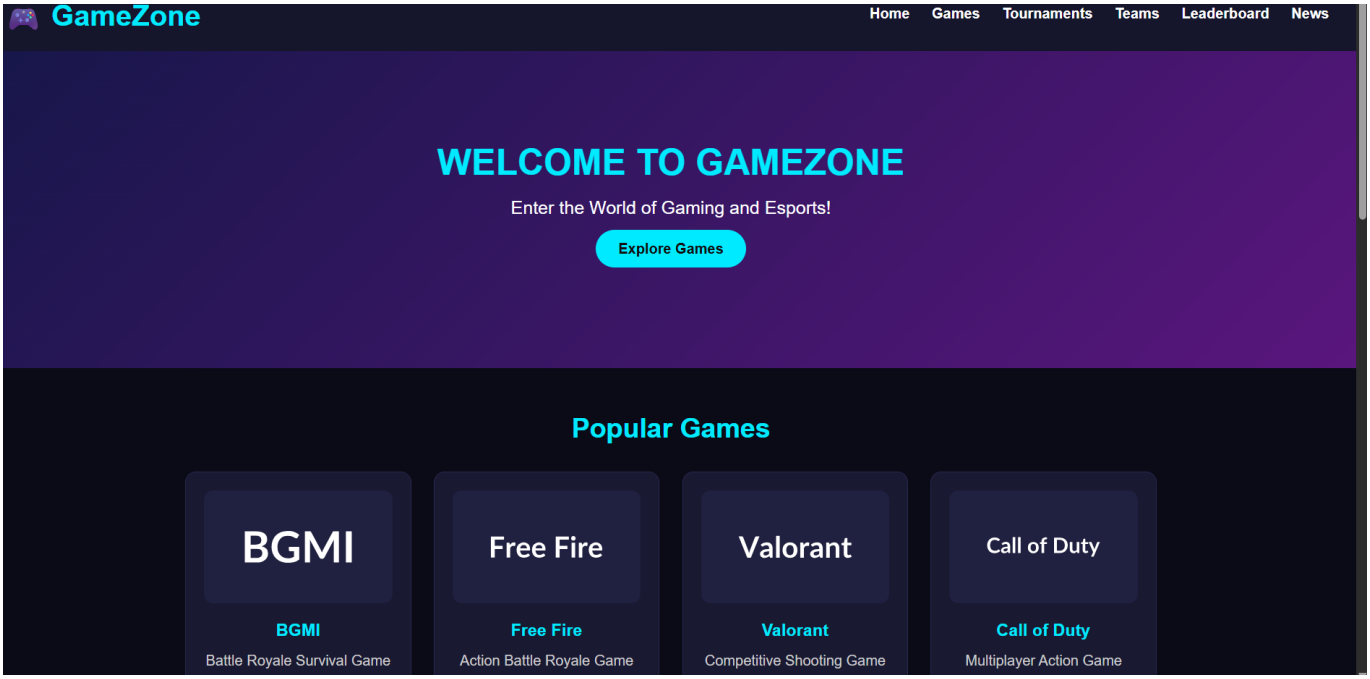

Observed output

The supplied screenshots show GameZone and popular games, the tournament schedule and team cards, and the player leaderboard and latest gaming news.

Source files: case-23-gaming-esports/index.html and case-23-gaming-esports/style.css

OUTPUT EVIDENCE

Case 23 · GameZone home and popular games

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

OUTPUT EVIDENCE

Case 23 · Tournament schedule and esports teams

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.

OUTPUT EVIDENCE

Case 23 · Player leaderboard and gaming news

Provided screenshot included without content changes. Grouped under this case study based on the visible website title and page sections.
